APPROACH

The fund seeks to identify companies that appear undervalued by the market but have the potential for long-term growth.

PROCESS

- The fund uses quantitative models and fundamental research to select stocks whose value may not be fully recognized by the marketplace.
- Selected stocks are then screened for catalysts that might lead to future price appreciation.

PORTFOLIO MANAGEMENT TEAM

Lead portfolio managers Tom Kolefas and Rich Cutler are supported by TIAA-CREF's centralized global research staff of over 40 sector specialists.

* The fund and benchmark index performance shown is computed from the inception date of the class (the date on which the class became publicly available). Previously, since-inception performance was computed from the day prior to the inception date.

The returns quoted represent past performance, which is no guarantee of future results. Returns do not reflect the taxes that a shareholder would pay on fund distributions or on redemptions of fund shares. The value of your investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Current performance may differ from that shown above. PORTFOLIO STATISTICS DEFINITIONS

Median Market Cap The midpoint of market capitalization of the stocks in a portfolio.

Average Weighted Market Cap The weighted and adjusted arithmetic mean of the market cap.

P/E Ratio P/E is the price of a stock divided by its forecasted earnings per share for the next 12-month period.

P/B Ratio P/B is the price of stock as of the latest quarter's book value per share divided by the current closing price.

Dividend Yield This is the indicated annual dividend for each stock divided by the price of the stock as of the characteristic report processing date. This is not the fund's actual yield.

EPS Growth Shows the relative growth of EPS over the previous 1-year reporting period.

R Squared A statistical measure that represents the percentage of a fund's movements that are explained by movements in a benchmark index.

Beta The systematic risk of a portfolio. A beta of 1 means the fund varies in tandem with the benchmark.

Information Ratio The portfolio's excess return divided by the tracking error.

Hist. Tracking Error The standard deviation of the excess return.

Sharpe Ratio The expected return over the T-bill divided by the portfolio standard deviation.

Standard Deviation A statistical measure of how much a return varies over an extended period of time. The more variable the returns, the larger the standard deviation.

Turnover Calculated by dividing the lesser of purchases or sales by the average value of portfolio assets during the period.

% Cash The percentage of cash held in the portfolio.

Holdings The number of securities held in the portfolio.
